

Sales Data Analysis Report

This report presents an analysis of the Superstore sales dataset using Python, Pandas, and Matplotlib. The objective is to identify sales trends, profitable categories, top-performing products, and regional performance.

Objectives:

Analyze overall sales and profit. Identify top-selling products. Visualize regional sales performance. Understand category-wise profit trends.

Tools & Technologies:

Python Pandas Matplotlib Jupyter Notebook GitHub

Project Outputs:

Visualization	Purpose
Sales Trend	Monthly sales analysis
Top Products	Best performing products
Regional Sales	Sales by region
Category Profit	Profit by category

Conclusion:

The project successfully analyzed sales data and generated useful business insights through visualizations and KPI analysis.
